Existing Labs

Upper Canada College Interior Alterations 2013

The project team began planning the new Science Labs months ahead of commencing work on site. This early work is vital to the success of the project.

The science lab renovations will enhance the opportunities for the students to explore their passion for science and learning.

The state-of-the-art classrooms and labs will change the learning environments, which will renew the ways students are educated and will play an important role in developing tomorrow's leaders.

Our goal is to help UCC to realize their vision by providing the leadership and professional skills to achieve their "Definition of Success". Work has commenced on site and the photos capture the beginning. We are moving forward with implementing the renovations.

We look forward to sharing our progress with the UCC community as the project proceeds.
